ESTABLISHED 2020

“The Office” business center was created by the people that faced the same issues as all start-ups, freelancers and entrepreneurs are facing: expensive rental places, high startup costs, limited access to industry events and lesser possibilities to grow a network.

Our mission is to inspire transformation and togetherness. We bring freelancers, entrepreneurs, startups and small businesses together under one roof, creating a multitalented community of individuals who thrive in supportive, motivating and interactive working environments.
